Mix of hard and soft woods
Will fade/decompose slightly
faster

Bulk Mulches

Premium Hardwood

- 100% pure hardwood bark
- Consists of shredded and composted bark from hardwood trees.
- The bark is composted for at least 6 months, then shredded and screened. The longer the bark is aged, the darker it gets.
- *Best seller*

Hardwood Fines

- *Finer Grind*
- 100% pure hardwood bark
- Consists of shredded and composted bark from hardwood trees.
- The bark is composted for at least 6 months, then shredded and screened. The longer the bark is aged, the darker it gets.

Bulk Mulches

Playground

- Wood from hardwood trees ground to a soft texture
- A popular choice for under swing sets and other play equipment.

Brown Dyed

- Dyed mulch maintains its vibrant color longer than your typical Hardwood mulch
- Made from composted recycled tree brush fiber and hardwood bark.
- ***All natural, non-toxic coloring agents safe for people, pets, and plants.*** These coloring agents are derived from some of the Earth's most common elements. These include Carbon, Iron Oxide, and Iron Oxide-Hydroxide.

Bulk Mulches

Black Dyed

- Dyed mulch maintains its vibrant color longer than your typical Hardwood mulch
- Made from composted recycled tree brush fiber and hardwood bark.
- ***All natural, non-toxic coloring agents safe for people, pets, and plants.*** These coloring agents are derived from some of the Earth's most common elements. These include Carbon, Iron Oxide, and Iron Oxide-Hydroxide.

Red Dyed

- Dyed mulch maintains its vibrant color longer than your typical Hardwood mulch
- Made from composted recycled tree brush fiber and hardwood bark.
- ***All natural, non-toxic coloring agents safe for people, pets, and plants.*** These coloring agents are derived from some of the Earth's most common elements. These include Carbon, Iron Oxide, and Iron Oxide-Hydroxide.

Bulk Soils

Top Soil Plus

- Our top soil is screened and half pulverized – half compost, making it rich, easy to work with
- Top soil should be your first choice for sewing grass seed, filling in low spots in your lawn and using near the house foundation as backfill.

Black Dirt

- Black dirt comes from the lower layers of peat bogs and is made up of decomposed plants and essential nutrients.
- Heavy clay soils can be loosened, or sandy light soils can be stiffened by adding black dirt.
- Holds water well, reducing your need to water.
- Applications include potting plants, lawn / garden soil amendments, and it is great for raised-beds!

Bulk Soils

Mushroom Compost

- Mushroom Compost is a totally organic, rich, moist mixture of wheat straw, peat moss, cottonseed meal, cottonseed hulls, corncobs, cocoa bean shells, gypsum, lime, chicken litter and/or horse stable bedding.
- This combination of ingredients is used in commercial mushroom farms to grow mushrooms.
- Following production of mushrooms the compost is cooked off at 160 F for 10 hours to kill undesirable pest and is usually free from weed seeds.
- ***Great for gardens and flower beds!***

Raised-Bed Mix

- 50/50 mix of Black Dirt and Mushroom Compost
- Great for any garden or flower bed!!
